Interview. Jim Douglas, Curator of the Nichols Archive. [date of interview/meeting]

QUESTIONS TO ANSWER (These are ones you will want to answer but you may think of others as well!) Weave the answers into your paper in a logical manner

What – What is your topic about

- What was its equipment. Did it change over the years

When – when did it begin? When did it end? Were there times when it went out of existence? Why?

Where –When – When did major events in the station's history occur and what were they?

Who – Who participated? What kind of training did they receive?

Why – Why was it created? What was/is its purpose? Why did it end ?(see Jim Douglas, Curator of Nichols Archive)

So What? – What impact did this have on the Nichols community and beyond?
